lawrencedegoma02@gmail.com | Glendale, CA | (818) 245-0308 | www.linkedin.com/in/lawrencedegoma

EDUCATION

California State University of Long Beach – College of Engineering
BS Computer Science

Expected Dec 2026

Pasadena City College

June 2024

AA Engineering and Technology | AS Mathematics | AS Natural Science

SKILLS

Languages: C++, C, Python, JavaScript, Haskell, Java, Swift

Frameworks and Libraries: React, Node.js, Next.js, Bootstrap, Tailwind, Typescript

Databases: MongoDB, Firebase

Operating Systems: MacOS, Linux

Developer Tools: Git, Neovim, Visual Studio, PyCharm, CLion

PROJECTS

HandtrackerHUD | Python, OpenCV

<https://github.com/lawrenceDegoma/HandTrackerHUD>

- Built real-time landmark processor using MediaPipe and OpenCV to detect fingertips, paths, and gestures
- Integrated Spotify Web API (Spotipy) for playback control and implemented gesture/tap detection
- Added voice control (background listener), macOS window capture support, and error handling and API call caching
- Implemented an interactive “draw with fingers” workflow, granting the ability to create windows through gestures
- Warped and composited content into the perspective transform and built custom OpenCV miniplayer UI

Bartending Ordering System | React, Firebase

<https://biggiesbar.vercel.app/>

- Engineered a real time web application to streamline operations by queuing customer drinks to an ipad interface
- Built a responsive React and Tailwind frontend for a seamless and intuitive ordering experience
- Integrated Firebase to synchronize orders instantly across multiple devices
- Optimized backend logic for speed, reliability, and scalability during high volume events
- Deployed the system for live use at private events, enhancing workflow efficiency for bartenders

Car Price Checker Website | React, Node.js, MongoDB

<https://github.com/lawrenceDegoma/Car-Price-Checker>

- Developed a full-stack car price comparison tool that aggregates listings from Craigslist and public vehicle APIs
- Built a React based frontend style with Tailwind, displaying real-time car listings in a marketplace layout
- Engineered backend in Node.js with Express that integrates web scrapers and APIs, storing data in a Mongo Database
- Implemented zip code extraction and filtering logic to improve location accuracy
- Designed a scalable system architecture to support dynamic searches, and user queries across multiple sources

Cafe Index Website | HTML, CSS, Js

<https://lawrencedegoma.github.io/sea-Round2-Project/>

- Built a responsive website for cafe recommendations in greater LA, OC, and Pasadena areas without frameworks.
- Implemented dynamic user interactions using Javascript to provide a seamless browsing experience.
- Designed with creative inspiration from the Pokédex in Pokemon games, showcasing a unique gamified user interface.
- Focused on clean, maintainable code and user-centric design principles.

HTML/CSS Parser | C++

https://github.com/lawrenceDegoma/HTML_Parser

- Developed a custom HTML/CSS parser using C++ to render web pages in SFML (Simple and fast multimedia library).
- Engineered an efficient parsing architecture by organizing HTML into a tree structure for streamlined processing.
- Demonstrated deep understanding for HTML and CSS structure by translating web documents into graphical representation.
- Focused on performance optimization and modular code, enabling easy expansion and maintenance.

PROFESSIONAL EXPERIENCE

Ishkaster Media

Website Developer Intern

Aug. 2024 – Jan. 2025

- Developed a dynamic marketplace, building both frontend and backend systems.
- Utilized APIs from Amazon and Best Buy to populate the marketplace with real-time data.
- Designed a user friendly UI using Shopify frontend, creating a smooth user experience.
- Built backend systems in Node.js to manage API integrations.
- Implemented data validation and security measures to ensure site reliability.

Starbucks

Barista

Sep. 2021 – Present

- Prepared a variety of beverages from a menu of 60+ items, ensuring consistent quality and customer satisfaction.
- Fostered a positive and welcoming atmosphere for customers and team members, enhancing overall morale.
- Led and coordinated a team of baristas during high-traffic periods, optimizing workflow and minimizing delays.
- Mentored new hires and provided ongoing support to veteran staff, contributing to a strong, cohesive team.
- Cultivated a community-centric environment, positioning the store as a “third place” for customers.

Individual Work

Private Tutor

Jul. 2022 – Sep. 2023

- Designed and implemented customized lesson plans with a focus on mathematics, tailored to individual learning styles.
- Applied a philosophical approach to teaching, making complex concepts relatable and fostering deeper student engagement.
- Encouraged a growth mindset, helping students build confidence and improve problem solving abilities.
- Delivered measurable improvements in student performance and retention, with a proven track record of success.
- Notably, several students received a perfect score of a 5 on the 2024 AP Calc AB exam, demonstrating effective tutoring.
